

Commerx Security Solutions

Overview

Commerx Security Solutions provides an industry-leading network (NOC) and security operations center (SOC) as-a-service with core offerings anchored by a dedicated 24x7 network support and concierge security team. Our services with Artic Wolf prevent cybercrimes before they occur, detect cyber threats in progress, and facilitate response, protecting companies from today's most serious risks.

Firewall Monitoring and Management: 24x7 support of firewall rules, configurations, logs, alerts, automated critical patches, and firmware updates

Endpoint Protection: improve the efficiency and mitigate the risk of security issues for device management

Managed Detection and Response (MDR): 24x7 network and endpoint monitoring, threat analysis, and incident response

Managed Risk: continuous external and internal vulnerability scanning to provide risk visibility and prioritization

THE COMMERX DIFFERENCE

Cybersecurity threats are a growing concern for Canadian companies of all sizes, and within all industries. No business is safe from hackers and bad actors that have malicious intent to gain profit at your expense.

Commerx Security Solutions provides peace of mind against cyber attacks that balances your business needs with your budget.

IDENTIFY YOUR SECURITY GAPS BEFORE YOUR ATTACKERS DO
